Spy Sweeper— Software to protect your computer from Spyware

Today's spyware is far more harmful than ever before, placing personal information, privacy, and perhaps even your identity at risk. Spyware and Adware have become a major hinderance to computer performance and internet usage. But now, Webroot Software, Inc., has a product to help protect your computer from the effects of malware—software that is loaded on your computer by outside sources without your knowledge.

Dedicated to combating spyware since its inception, Webroot Software understands the complexity of spyware and has designed **Spy Sweeper 4.5** with **the most advanced blocking, detection and removal** capabilities on the market.

Spy Sweeper uses 16 advanced Smart Shields, including ActiveX, Toolbar, and Spy Communications shields that block new spyware installations so you can have the peace of mind you deserve knowing you've got proactive, always-on protection.

Using state-of-the-art spyware research methods that identify new spyware threats before they are widely distributed, Spy Sweeper ensures you have the most powerful and up-to-date protection against new emerging spyware threats.

Spy Sweeper's Comprehensive Removal Technology (CRT) is the backbone behind the most advanced spyware removal engine in the industry. CRT deletes the toughest spyware programs in just one sweep - even removing mutated or "rootkit" spies, some of the nastiest next-generation spyware threats.

And to ensure you have the most advanced spyware protection available, Spy Sweeper upgrades up to four times a year, and provides those upgrades to their customers absolutely FREE.

As a Spy Sweeper customer, you can rest assured that you always have back up. Their expert and friendly support team is there to answer any questions you have. And contrary to most software providers who charge for support, they provide support absolutely FREE!
